

Publications on the Straub Mechanical Thrombectomy System

Ilio-femoro-popliteal arteries

1. Stanek F, Ouhrabkova R, Prochazka D.
Mechanical thrombectomy using the Rotarex catheter – safe and effective method in the treatment of peripheral arterial thromboembolic occlusions. Vasa. 2010 Nov;39(4):334-40.
<http://www.ncbi.nlm.nih.gov/pubmed/21104623>
2. Silingardi R, Cataldi V, Moratto R, Azzoni I, Veronesi J, Coppi G.
Mechanical thrombectomy in in-stent restenosis: preliminary experience at the iliac and femoropopliteal arteries with the Rotarex System. J Cardiovasc Surg (Torino). 2010 Aug;51(4):543-50.
<http://www.ncbi.nlm.nih.gov/pubmed/20671638>
3. Wissgott C, Kamusella P, Richter A, Klein-Weigel P, Schink T, Steinkamp HJ.
Treatment of acute femoropopliteal bypass graft occlusion: comparison of mechanical rotational thrombectomy with ultrasound-enhanced lysis Original text in German. RöFo 2008 Jun;180(6):547-552.
<http://www.ncbi.nlm.nih.gov/pubmed/18484516>
4. Wissgott C, Kamusella P, Richter A, Klein-Weigel P, Steinkamp HJ.
Mechanical rotational thrombectomy for treatment thrombolysis in acute and subacute occlusion of femoropopliteal arteries: retrospective analysis of the results from 1999 to 2005 Original text in German. RöFo 2008 Apr; 180(4):325-331.
<http://www.ncbi.nlm.nih.gov/pubmed/18499908>
5. Wissgott C, Steinkamp HJ.
Mechanical rotational thrombectomy: development of patency- and complication-rates from 1999 to 2004 Original text in German. RöFo 2006; 178 DOI: 10.1055/s-2006-940859
<http://www.thieme-connect.com/ejournals/abstract/roefo/doi/10.1055/s-2006-940859>
6. Duc SR, Schoch E, Pfyffer M, Jenelten R, Zollikofer CL.
Recanalization of acute and subacute femoropopliteal artery occlusions with the Rotarex catheter: one year follow-up, single center experience. Cardiovasc Intervent Radiol. 2005 Sep-Oct; 28(5):603-610.
<http://www.ncbi.nlm.nih.gov/pubmed/16132388>
7. Wissgott C, Steinkamp HJ.
Acute occlusion of femoropopliteal bypass: comparison of results of rotational thrombectomy catheters and local lysis Original text in German. RöFo 2005; 177 DOI: 10.1055/s-2005-867768
<http://www.thieme-connect.com/ejournals/abstract/roefo/doi/10.1055/s-2005-867768>
8. Zeller T.
Recanalisation of thrombotic occlusions of pelvis-limb-supplying arteries and bypasses by rotational thrombectomy with particular consideration of the Straub-Rotarex-catheter Original text in German. VASA 2004;33:Suppl. 64
<http://www.verlag-hanshuber.com/zeitschriften/journal.php?abbrev=VAS&show=abstract&abstract=15490>
9. Wissgott C, Werk M, Steinkamp HJ.
Comparison of rotational thrombectomy catheters and local lysis therapy for treatment of acute and subacute thrombotic arterial occlusions. Original text in German. RöFo 2004; 176 DOI: 10.1055/s-2004-827524
<http://www.thieme-connect.com/ejournals/abstract/roefo/doi/10.1055/s-2004-827524>

Ilio-femoro-popliteal arteries

10. Zeller T, Frank U, Bürgelin K, Sinn L, Horn B, Schwarzwälder U, Roskamm H, Neumann FJ.
Treatment of acute embolic occlusions of the subclavian and axillary arteries using a rotational thrombectomy device. Vasa. 2003 May; 32(2):111-116.
<http://www.ncbi.nlm.nih.gov/pubmed/12945107>
11. Zeller T, Frank U, Bürgelin K, Müller C, Flügel P, Horn B, Schwarzwälder U, Neumann FJ.
Early experience with a rotational thrombectomy device for treatment of acute and subacute infra-aortic arterial occlusions. J Endovasc Ther. 2003 Apr; 10(2):322-331.
<http://www.ncbi.nlm.nih.gov/pubmed/12877617>
12. Zeller T, Frank U, Bürgelin K, Sinn L, Horn B, Roskamm H.
Acute thrombotic subclavian artery occlusion treated with a new rotational thrombectomy device. J Endovasc Ther. 2002 Dec; 9(6):917-921.
<http://www.ncbi.nlm.nih.gov/pubmed/12546597>
13. Zeller T, Frank U, Bürgelin K, Schwarzwälder U, Horn B, Flügel PC, Neumann FJ.
Long-term results after recanalization of acute and subacute thrombotic occlusions of the infra-aortic arteries and bypass-grafts using a rotational thrombectomy device. Original text in German. RöFo 2002 Dec; 174(12):1559-1565.
<http://www.ncbi.nlm.nih.gov/pubmed/12471529>
14. Bérczi V, Deutschmann HA, Schedlbauer P, Tauss J, Hausegger KA.
Early experience and midterm follow-up results with a new, rotational thrombectomy catheter. Cardiovasc Intervent Radiol 2002 Jul-Aug; 25(4):275-281.
<http://www.ncbi.nlm.nih.gov/pubmed/12042988>
15. Schmitt EM.
Thrombectomy with the Straub-Rotarex-Catheter in acute and subacute occlusions of leg arteries: a multicenter study. Original text in German. Med. Diss. Basel 2002
Not available online.
16. Zeller T, Müller C, Frank U, Bürgelin K, Horn B, Roskamm H.
The Straub-Rotarex® thrombectomy device: initial experience. Original text in German. Röfo 2001 Jul;173(7):626-31.
<http://www.ncbi.nlm.nih.gov/pubmed/11512235>
17. Jäger K.A., Schmidt E.M., Schmidt H.E., Labs K.H.
Peripheral thrombectomy with a new Straub-Rotarex-Catheter: A Multicenter Study. International Angiology 2000 Jun; 19 (supplement 1 to issue no. 2): 17 a
Not available online.
18. Schmitt HE, Jäger KA, Jacob AL, Mohr H, Labs KH, Steinbrich W.
A new rotational thrombectomy catheter: system design and first clinical experiences. Cardiovasc Intervent Radiol 1999 Nov-Dec; 22(6):504-509.
<http://www.ncbi.nlm.nih.gov/pubmed/10556411>

Arteries of the abdomen

19. Popovic P, Kuhelj D, Bunc M.
Superior mesenteric artery embolism treated with percutaneous mechanical thrombectomy. Cardiovasc Intervent Radiol. 2011 Feb;34 Suppl 2:S67-9. Epub 2010 Jun 23.
<http://www.ncbi.nlm.nih.gov/pubmed/20574794>
20. Lichtenberg M, Hailer B.
Recanalisation of an acutely thrombosed aortic stent graft using rotational thrombectomy. Original text in German. Zeitschrift für Gefäßmedizin 2010; 7 (2), 16-21
<http://www.kup.at/kup/pdf/9026.pdf>
21. Loupatatzis C, Stoupis C, Seiler C, Candinas D, Do DD, Triller J.
Use of a Mechanical Thrombectomy Device to Recanalize a Subacutely Occluded Aortohepatic Bypass After Orthotopic Liver Transplantation. Journal of Endovascular Therapy: Vol. 12, No. 3, pp. 401-404. doi: 10.1583/04-1447R.1
<http://enth.allenpress.com/enthonline/?request=get-document&doi=10.1583%2F04-1447R.1>

DVT & Vena Cava & other veins of the abdomen

22. Lou WS, Gu JP, He X, Chen L, Su HB, Chen GP, Song JH, Wang T.
Endovascular Treatment for Iliac Vein Compression Syndrome: A Comparison between the Presence and Absence of Secondary Thrombosis. Korean J Radiol. 2009 Mar-Apr; 10(2): 135-143.
<http://www.pubmedcentral.nih.gov/articlerender.fcgi?tool=pubmed&pubmedid=19270859>
PDF-Version: <http://www.kjronline.org/abstract/files/v10n02135.pdf>
23. Shi HJ, Huang YH, Shen T, Xu Q.
Percutaneous mechanical thrombectomy combined with catheter-directed thrombolysis in the treatment of symptomatic lower extremity deep venous thrombosis. Eur J Radiol. 2008 Jun 2. [Epub ahead of print]
<http://dx.doi.org/10.1016/j.ejrad.2008.04.015> or <http://www.ncbi.nlm.nih.gov/pubmed/18524519>
24. Quateen A, Pech M, Berg T, Bergk A, Podrabsky P, Felix R, Ricke J.
Percutaneous transjugular direct porto-caval shunt in patients with Budd-Chiari syndrome. Cardiovasc Intervent Radiol. 2006 Jul-Aug;29(4):565-70.
<http://www.ncbi.nlm.nih.gov/pubmed/16729230>
25. Erne P, Jamshidi P.
Percutaneous aspiration of inferior vena cava thrombus. J Invasive Cardiol. 2006 May;18(5):E149-51.
<http://www.ncbi.nlm.nih.gov/pubmed/16670455>
Online version: <http://www.invasivecardiology.com/article/5642>

Ruling out hemolysis

26. Husmann M, Baumgartner I.
No hemolysis after thrombectomy with the Rotarex/Aspirex devices. White paper/abstract. Bern 2006.

In-vitro

27. Kucher N, Windecker S, Banz Y, Schmitz-Rode T, Mettler D, Meier B, Hess OM.
Percutaneous catheter thrombectomy device for acute pulmonary embolism: in vitro and in vivo testing. Radiology 2005 Sep;236(3):852-8. Epub 2005 Jul 12.
<http://www.ncbi.nlm.nih.gov/entrez/utils/fref.fcgi?PrId=3051&itool=AbstractPlus-def&uid=16014440&db=pubmed&url=http://radiology.rsnajnl.org/cgi/pmidlookup?view=long&pmid=16014440>
28. Krueger K, Deissler P, Coburger S, Fries JW, Lackner K.
How thrombus model impacts the in vitro study of interventional thrombectomy procedures. Invest Radiol. 2004 Oct;39(10):641-648.
<http://www.ncbi.nlm.nih.gov/pubmed/15377944>
29. Müller-Hülsbeck S, Dimitte DN, Jahnke T, Hedderich J, Grimm J, Heller M.
In-vitro comparison of the effectiveness of different high-speed rotatory catheters. Original text in German. RöFo 2003 Mar; 175(3):406-412.
<http://www.ncbi.nlm.nih.gov/pubmed/12635019>
30. Zana K, Otal P, Fornet B, Forrai G, Chabbert V, Smayra T, Joffre F, Rousseau H.
In vitro evaluation of a new rotational thrombectomy device: the Straub Rotarex catheter. Cardiovasc Intervent Radiol 2001 Sep-Oct; 24(5):319-323.
<http://www.ncbi.nlm.nih.gov/pubmed/11815837>

Literature reviews

31. Lichtenberg M.
Percutaneous mechanical thrombectomy by means of rotational thrombectomy. Current study situation. Original text in German. Med Klin (Munich). 2010 Oct;105(10):705-10. Epub 2010 Oct 28.
<http://www.ncbi.nlm.nih.gov/pubmed/20981589>
32. Horsch AD, van Oostayen J, Zeebregts CJ, Reijnen MM.
The Rotarex® and Aspirex® mechanical thrombectomy devices. Surg Technol Int. 2009;18:185-92.
<http://www.ncbi.nlm.nih.gov/pubmed/19579204>
33. Vorwerk D.
Mechanical thrombectomy is an alternative way to go: the European experience. Commentary on: quality improvement guidelines for percutaneous management of acute limb ischemia. Cardiovasc Intervent Radiol. 2006 Jan-Feb; 29(1):7-10.
<http://www.ncbi.nlm.nih.gov/pubmed/16184322>
34. Vorwerk D.
Mechanical thrombectomy in acute and subacute leg ischemia. Acta Chir Belg. 2003 Nov-Dec; 103(6):548-554. Review.
<http://www.ncbi.nlm.nih.gov/pubmed/14743557>
35. Müller-Hülsbeck S, Jahnke T.
Peripheral arterial applications of percutaneous mechanical thrombectomy. Tech Vasc Interv Rad 2003 Vol 6, No 1 (March), pp. 22-34
<http://www.ncbi.nlm.nih.gov/pubmed/12772126>
